

**PQRI Conference on Advancing Drug Product Quality and Development
December 15-16, 2009
Hilton Executive Meeting Center
Rockville, Maryland**

Background and Objectives

Join the experts from the pharmaceutical industry, the U.S. Food and Drug Administration, and the U.S. Pharmacopeia to exchange scientific information, discuss methodology, and share in current PQRI research successes. We encourage you to help us think critically about our new science-based projects.

Our objective is to provide a forum to gather pharmaceutical experts from all areas including industry, regulating bodies, standard setting organizations, and academia to exchange scientific information, discuss methodology, and share in current PQRI research successes: In addition, we will:

- illustrate the strengths of PQRI in advancing science-based research;
- solicit new ideas on projects proposed and in early stages of development;
- share current project advancements through presentations and scientific posters; and
- introduce the mission of PQRI to those who are not members, and entice new members.

Preliminary Agenda

December 15, 2009

Session I: PQRI - Past and Present

Session II: PQRI Future Project Proposals

Reception with PQRI Posters of Past and Current Work Projects
