

## **IPAC-RS Device Change Survey: Comments requested by March 31, 2010**

One of the recommendations of the 2009 PQRI workshop [Understanding the Requirements for Demonstrating Bioequivalence in Orally Inhaled Drug Products](#) was a cross-industry survey of device change experiences ([click here](#)).

The IPAC-RS Device Group has now developed a set of scenarios and questions to explore these issues, and in particular, the perception of change impact.

Before launching the interactive online survey, the group is inviting public comment on the questionnaire ([click here](#)) and on the device change scenarios ([click here](#)).

If you have any comments on the questionnaire or change scenarios, please submit them by **March 31, 2010** to [info@ipacrs.com](mailto:info@ipacrs.com).
